

Business Unit: Power Business

Position: Solar Rooftop Operator

JOB SUMMARY

As solar rooftop sites are now expanding rapidly, the Solar Rooftop team needs to prepare for on-going operation support of all rooftop sites, which are located all over Thailand and other regions. The incumbent will act as a centralized control to monitor from Command Center Room in Dr. Gerhard Link Building in order to ensure that every rooftop site can operate as expected.

ROLES AND RESPONSIBILITIES

- Monitor Solar Rooftop plant status (Plant Administration)
- Communicate with Operation Support team to conduct on-site inspection for any incidents detected by the system
- Arrange and maintain plants' maintenance schedule for all Operation & Maintenance services
- Create and maintain monthly and annual operation report

MINIMUM QUALIFICATIONS

- Bachelor's degree in IT, Computer, or Engineering (Electrical engineering) field.
- At least 2 years of experience. Experience in Solar Rooftop/Farm Operation is preferable.
- Good command of English.
- Strong teamwork.
- Time management skills, timeliness and punctuality.
- Ability to work independently.
